Referee #2 remarks in his/her comment: "[T]he paper in its current form does not meet the journal's standards in terms of flow, style, grammar and spelling." Following this remark, examples for spelling mistakes and missing words are given. Since the remark is more general and mentions the flow, the style and grammar problems, it would be very helpful to receive a more detailed reference in this respect. I very much appreciate a direct contact, since I always looking for chance for further improvement.
